

### A smart, soft, sanctuary

This house is located in a hurricane zone on the east coast of the US, so special windows and doors were installed for extra protection. Painted white, they blend in with the interior scheme and don't disrupt the view.

**What Sally did** Taking her colour cues from sand and sea and upping the intensity a notch or two, Sally has created a smart bedroom sanctuary with layers of texture to soothe the senses and soak up sound.

**Why it works** Window treatments are simple and understated, allowing the comfortable furnishings to be the focal point. Rich, warm tones and luxurious layers – padded bedhead; mohair blanket; super-soft floor rug – are restful and alluring. The landscape photograph is a personal, decorative flourish.
